NOTICE OF ASSEMBLE

Tips for Assembling Wood

Find the corresponding block number, use a knife in the connection point gently press, you can take out the wood.

Use a knife to smooth out the burr.

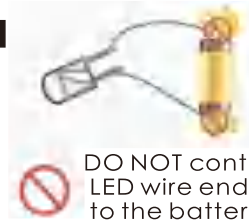

Or use sandpaper to smooth out the burr

Testing on LED function

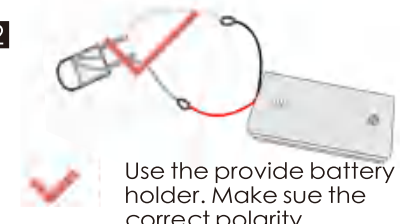

Be sure to test the LED lights before making the lighting, note that the LED white wire to the negative, gray wire to the positive reference to the following figure operation test.

1

DO NOT contact the LED wire end direct to the battery cell.

2

Use the provide battery holder. Make sue the correct polarity.

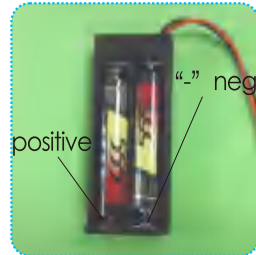

How to assemble the battery holder

1. Material and tools needed:
- Battery holder, LED bulb, tape, screw driver and 2 pieces AAA size battery (not provided)

2. Use screw driver and take the lid off from the battery holder.

3. Insert the battery take notes on the polarity.

4. Connect the red wire to grey wire. Connect the black wire to white wire.

5. Wrap the exposed wire with the tapes.

6. Place the box lid and fastness with screw driver.

Symbol description used

Install parts in the opposite direction

Install the same parts on both sides

Pay attention to the direction of installation material B stick to

Fold in half according to dotted line

fold double edge to center dotted line

Fold four sides to the middle

Pay attention to the direction of installation material A stick to material B

combination part according to 1 2 3 so on.

About the use of glue

Method for using glue:

1. After applying the glue, let it dry for a few seconds before pasting.
2. Fix it slightly with your hands, and finally put it aside to dry;

Tips:

When pasting the plane printing paper, a piece of waste bank card or telephone card can be used to wipe evenly after the glue is smeared on the wood board, and then the printing paper is pasted to squeeze out the air inside.

Types of glue:

White latex: Used for adhering soft materials, such as wood and paper.
Alcoholic Glue: Used for adhering hard materials such as cloth, plastic, beads, wire, dust cover, etc.

◀ Can be peeled off along this line for easy use

How to assemble the battery holder

Statement: the lamp wires cannot be inserted into the output socket.

- - Can use 2*AAA batteries
- - Please notice the place of anode and cathode when put in the batteries
- - Rechargeable batteries are not blunt electricity
- - Rechargeable batteries can only be charged under adult supervision
- - Rechargeable batteries should be removed from the toy before charging
- - Different types of batteries cannot mix; Do not mix new batteries in use with semi-used batteries.
- - Run out of battery should be removed from the toy
- - The power shall not be short circuit

1

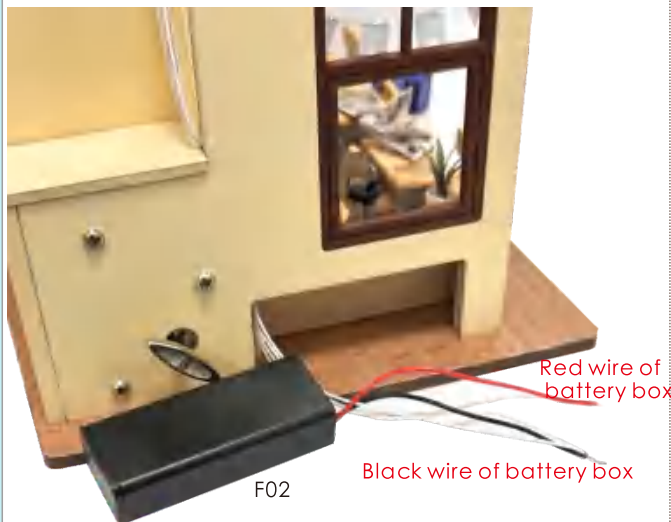

Cut the wires to a uniform length of approximately 8cm as shown in the picture

2

Peel off the outer skin of the light wire and twist the light wires of the same color together

3

First, twist the red wire of the battery box and the gray wire of the LED light, as well as the black wire of the battery box and the white wire of the LED light together

4

Wrap the wires with F04

5

Hide the battery box properly

Installation of dust cover

dust cover
(Upgrade version accessories need
to be purchased separately)

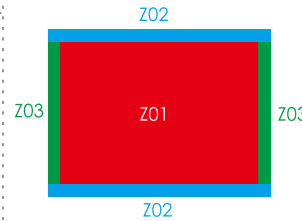

scale:1:7
Z01 plexiglass(transparent)
22*17*0.18cm(1 piece)

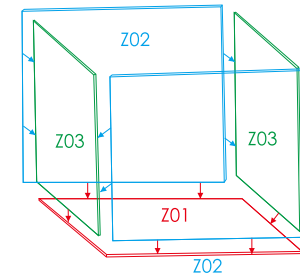

scale:1:7

22*16*0.18cm(2 pieces)

scale:1:7
Z03 plexiglass(transparent)
16.64*16*0.18cm(2 pieces)

stick Z02 and Z03 on Z01

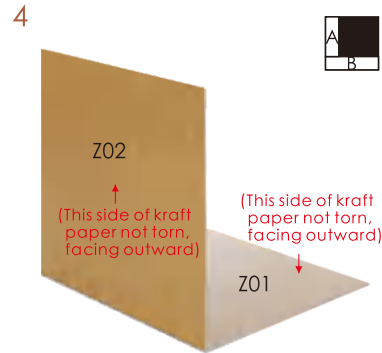

stick five pieces of plexiglass dust
cover as shown

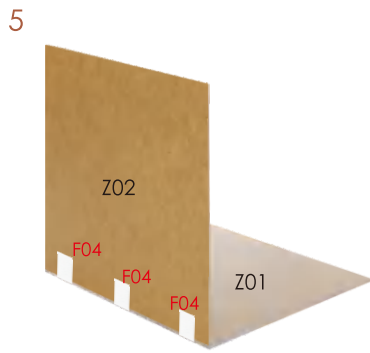

Ripped one side of kraft paper,
leaving one side of kraft paper

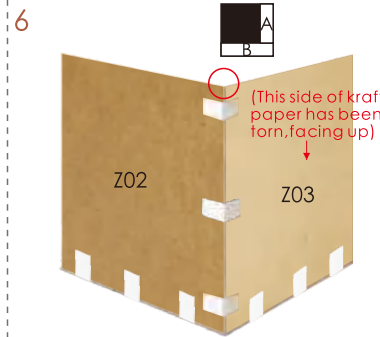

Take out the plexiglass and tear off the
kraft paper with text on each piece of
plexiglass

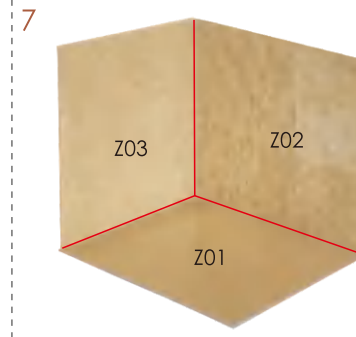

The kraft paper that has been ripped off
faces inwards, and the kraft paper that
has not been ripped out faces outwards.

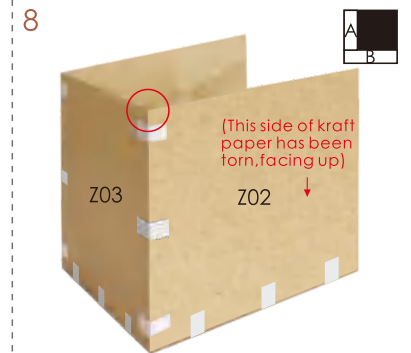

Use F04 to fix the junction of two pieces
of plexiglass, (use transparent tape to
replace F04)

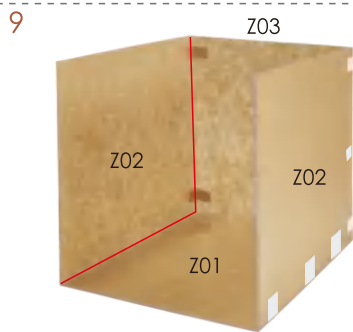

The junction of every two pieces of
plexiglass needs to be fixed with F04
(to prevent the plexiglass falling off)

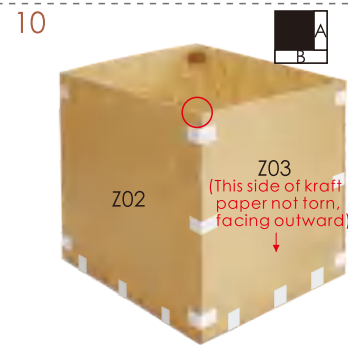

stick appropriate amount of glue to the interface
of the two pieces of glass and scrape it slightly
to make the glue penetrate into the junction
of the two pieces of glass (the red line is the
plexiglass interface)

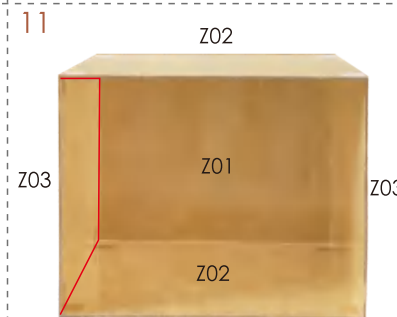

The junction of two pieces of plexiglass
needs to be fixed with F04 (to prevent
the plexiglass falling off)
